

**IN THE SPECIFICATION:**

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with ~~strikethrough~~.

Please REPLACE paragraph [0039] with the following paragraph:

[0039] The first paper sensor 107 detects the top and bottom edges 15 and 18 of a sheet of paper moving in the paper convey direction A and transmits the first top edge and bottom edge detection signals to the controller 120. The controller 120 controls the dynamic power switching from the pickup unit to the convey unit when the first top edge detection signal is generated, compares the first top edge and bottom edge detection signals with second top edge and bottom edge detection signals of the second paper sensor 111 which ~~deteet-s~~detects the top and bottom edges 15 and 18 to be later described, and controls the print start and end timing during which a sheet of paper is printed by the inkjet nozzles 104a of the printer head 104.
